AIR TO AIR HEAT PUMP AGREEMENT

This Agreement made this ___ day of _____, 20___, between the T.I.P. RURAL ELECTRIC COOPERATIVE, hereinafter called the "Cooperative", and _____ hereinafter called the "Member-Consumer", whereby the parties mutually agree to the following:

1. The Air to Air Heat Pump must be installed within 30 days of this agreement date, on the premise of the undersigned member-consumer. The member-consumer shall agree to an initial inspection by Cooperative personnel to verify program compliance before any rebates will be authorized.

2. The Cooperative and/or its power supplier, at their expense, has the right to control the member-consumer's air conditioner load using a 50% cycling strategy at such times and periods determined by the Cooperative or its power supplier. During any control period, the air conditioner will be cycled on and off for short periods. The total time that the unit will be controlled off will not exceed three hours in any twenty-four (24) hour calendar day. (Example: unit on 20 minutes then off 20 minutes; after 9 continuous cycles (or 6 hours), this unit would have been controlled off for the maximum 3 hours.) The Cooperative may exercise this option at any time after the date of this agreement.

5. The Cooperative and/or its power supplier shall not be liable to the Member-Consumer for any damage or loss which may be alleged to result from any malfunction of the control equipment installed under this Agreement, or from any electric power interruptions.

This Agreement shall be binding upon the successors, assigns, or transferees in interest of the parties. These terms and conditions are accepted by the following authorized signatures.
